calibration

ATC is proud to introduce this new combination compass and outside temperature display system. Latest state of the art circuitry includes FastCalò, SmartCalò, and an icing condition warning.

Feature packed system includes:

- ICE WARNING feature
- Continuous "self Calibration"
- Vacuum fluorescent display
- In-dash or console mountable with abs bezel to conceal screw
- Easy touch buttons for simple calibration-mode and fahrenheit/celcius
- Remote sensor for accurate compass readings
- Moisture-proof remote sensor for accurate outside temperature readings
- Sleep mode-one touch, 10 second display of compass/temperature with ignition off
- EPROM stored memory-no need to recalibrate after removing/reconnecting power source
- Complete kit with sensors, cables, and instructions
