LITERATURE NUMBER **MPD 91326**
**ADJUSTABLE THERMOSTAT
CONTROL REPLACEMENT**

Spark Ignition Models

Effective 11/19/07

For complete water heater instructions consult MPD 93756
Models 4-E & 10-E consult MPD 93755.

REMOVAL PROCEDURES:

Front Mount Thermostat

1. Turn switch to OFF position.

**⚠ CAUTION
ELECTRICAL DAMAGE**

- Label all wires before disconnecting when servicing.
 - Verify proper operation after servicing.
2. Disconnect the two (2) brown wires from thermostat terminals on front of water heater.
 3. Cut the black foam pad from top to bottom between the ECO (red wires) and the thermostat (brown wires). Peel the section covering the thermostat (brown wires) off and discard.

4. Remove clear, plastic washer and spring; discard.
5. Remove thermostat from behind metal tabs on water heater. Discard.

INSTALLATION PROCEDURES:

Front Mount Thermostat

1. Using a flat bladed screwdriver, push the 3 tabs that held the spring in place against the water heater tank.
2. Assemble the adjustable thermostat spring and bracket.
3. Place new thermostat retaining bracket leg tabs into opening.

Note: Both retaining leg tabs must be firmly locked behind the combustion pan.

ADJUSTABLE THERMOSTAT CONTROL REPLACEMENT

Spark Ignition Models

Effective 11/19/07

**For complete water heater instructions consult MPD 93756
 Models 4-E & 10-E consult MPD 93755.**

INSTALLATION PROCEDURES: (continued)

Front Mount Thermostat

Note: The adjustable thermostat must fully contact the water heater tank to operate properly.

4. Reconnect the two (2) brown wires to thermostat terminals.

5. The thermostat is factory set at "C". All letter increments are 10°F.
6. Peel backing off of danger label and stick label to inside of door.
7. Turn switch to ON position and check for ignition.

**⚠ WARNING
 SCALDING INJURY**

- Setting the temperature control dial at a higher position will produce hotter water.

**⚠ CAUTION
 PRODUCT FAILURE**

- Do not operate water heater without water in tank.
