### MIRAGE TIPS, FACTS, AND COMMONLY ASKED QUESTIONS:

---

#### THE MIRAGE:

- Available in either electric or manual crank models.
- 110V model has a manual override.
- Is available in Std. Acrylic solid or custom (vertical stripes) Sunbrella fabrics only.
- Has no vertical arms.
- Has a pitch adjustment of up to 3'.
- Automatic Wind Retraction is standard on all aftermarket MIRAGE awnings.  
(Direct Response Electronics also available as an option. Refer to Options Section Below.)

#### OPTIONS:

- Direct Response Electronic Package is available as an upgrade for an existing Mirage with the Automatic Wind Retract system OR as an option when ordering a new Mirage.

- Optional Custom Colored Cases are available in Champagne, Pewter and Black.
- The standard case end caps may be removed at any time and retrofitted with custom 12" tapered end caps with speakers and lights. Available in either black or white.

#### MEASURING TIPS:

- The MIRAGE awning measurement is end of case to end of case (including two 1.5" end caps). If you order the 12" tapered specialty end caps, the new length is determined as follows:  
*Example:*  
20' MIRAGE = 240" minus 3" (two 1.5" end caps) plus 24" (two 12" tapered end caps) = 261".

#### MOUNTING:

- The mounting bracket is 8" high and runs the entire length of the awning.
- Adequate support is required to secure the Mirage to the coach.  
\*\*See installation and owners manual.

#### ORDERING:

**You will need to know the following information:**

- Length of awning (in even foot increments). Length measurement is the actual length of the case including end caps.
