

## SUMMIT

Carefree's Summit Slideout cover provides all the benefits of an SOK and more. The innovative auto-rafter system provides a peaked contour to the fabric when the slideout is open; yet it stores flat between the coach wall and roll bar when the Slideout is closed. This contour is excellent for shedding water to prevent water pooling on the canopy.

Helps keep leaves, debris and rain off the roof and out of the vehicle and helps keep the room cooler by blocking the sun from the roof.

There are no locks to worry about or anti-billow devices to adjust.

The wind deflector is a standard integrated part of all Summits. An optional front cover is available for full case enclosure.

The sleek and stylish case design blends well with the coach sidewall.

### SELLING BENEFITS

- ☑ The Summit FI uses a unique lift-bar system that prevents water from pooling – it actually sheds water automatically.
- ☑ Helps keep leaves, debris and rain off the roof and out of the vehicle.
- ☑ Helps keep the room cooler by blocking the sun from the roof.
- ☑ Automatically moves in and out with the Slideout.
- ☑ No locks to worry about or anti-billow devices to adjust.
