SUPER SPORT TIPS, FACTS AND COMMONLY ASKED QUESTIONS:

THE SUPER SPORT:

- Is a vertical arm awning for folding camping trailers. Because the arms mount along the sidewall of the trailer, there are important ordering, measuring, and fit considerations.
- Awning canopy is constructed of a rugged 14oz. laminated vinyl. All vinyl colors are available, and the weatherguard is available in matching colors or white.
- Awning arms are available in white only.

MEASURING TIPS:

- Arms cannot interfere with the camper top latches. Make sure the latches remain exposed. Arms position can be either inside or outside of the latches. Your objective is to maximize the awning width. Find arm-mounting points at the top and bottom mounting locations that do not cover or interfere with the top latches.
- Awning rail to bottom of the framework must measure between 34"-40" when the trailer is closed.

MOUNTING:

- Top brackets are designed so that you do not have to perforate the trailer top when installing. The brackets slide into the awning rail. Each awning comes with a hardware pack that includes top brackets to fit straight angled and curved roofs. We also include brackets to fit Fleetwood Folding trailers with either an ABS or Metal roof. The top brackets provided do not need to be drilled into the sidewall or screwed into the rail molding.
- The bottom bracket is a long U-bolt that mounts to the frame, and has an adjustable standoff for the arm mount. NOTE: Some trailer frames may taper in at the bottom, so you may need to order the Bottom Bracket Extension Kit. This is ordered separately.
