 XL = 45"

WINDOW AWNING TIPS, FACTS AND COMMONLY ASKED QUESTIONS:**THE STANDARD, XL & 12V WINDOW AWNINGS:**

- Available in Vinyl, Polyweave, Fullview and Acrylic.
- Available with Vinyl weatherguard or Alumaguard
- Available with custom color arms and Alumaguard. Pewter, Champagne and Black.
- Fabric will measure 6" less than the awning size ordered.

MEASURING TIPS:

- Measure the window width (outside of frame to outside of frame) then add 6" and round up to the next available size. Example: If your frame measures 4' 4", add 6" = 4' 10". You would then order a 5' Window Awning.
- Measure the window height (outside of frame to outside of frame). If the window height is 36" or less, order the Standard Window Awning. If the window height is 37" or greater, order the XL Window Awning.
- All measurements are center of arm to center of arm.
- Bottom bracket on the Standard and XL measures 4" wide X 2 1/2" tall.
- **Tip** - If you do not have enough clearance for the standard window awning bottom bracket, order 2 OTD bottom brackets (PT # R00221 Black or White) and use them in place of the standard window awning bottom brackets. This will gain you 2" of mounting space on each side.
- 12V Window Awning requires you to allow 3.5" of clearance outboard of the center of the front arm (at the top) to accommodate the motor housing. You will need to allow 1.5" of clearance outboard of the back arm (at the top) to accommodate the roller housing.
- Carefree Standard & XL manual Window Awnings can be upgraded to the 12V Window Awning by changing out the arms and removing the springs.

ORDERING:

You will need to know the following Information:

- Length of awning.
- Window height.
- Choice of fabric, weatherguard or Alumaguard.
- Standard, XL, or 12V model.
- Arm color and style.
